NETFLIX MOVIE ANALYSIS

Understanding Movie Trends Through Data

A structured read of genre mix, ratings, popularity, and release-year questions.

GENRES | RATINGS | RELEASE YEARS

Made with GAMMA

THE QUESTION

What the analysis set out to uncover

Genre representation

Map genre representation across the catalog.

Audience ratings

Understand how audience ratings are distributed.

Popularity extremes

Identify the highest and lowest recorded popularity values.

Release-year patterns

Explore release-year patterns while separating validated findings from open questions.

Made with GAMMA

DATASET SCOPE

9,827

movie records

The movie-level starting point for the analysis.

What each record carries

FIELDS

Release date, title, overview, popularity, vote count, vote average, language, genre, and poster URL.

PREPARATION

Dates were converted, release years extracted, selected columns removed, and missing values and duplicates checked.

GENRE EXPANSION

Splitting multi-genre entries produced **25,793** movie-genre combinations, not distinct movies.

Made with GAMMA

ANALYTICAL WORKFLOW

The workflow turns raw records into analyzable features

01

Understand

Understand the dataset structure.

02

Clean

Clean and transform the fields.

03

Engineer

Engineer release-year and genre-level features.

04

Explore

Explore patterns with descriptive statistics.

05

Visualize

Visualize findings and identify follow-up questions.

Python · Pandas · NumPy · Matplotlib · Seaborn

GENRE MIX

3,744

recorded Drama genre appearances

14.52%

19 DISTINCT GENRE CATEGORIES

Drama leads the genre mix

MEASURE

14.52% of the **25,793** movie-genre combinations.

INTERPRETATION

Counts represent genre appearances, not unique movies or market share.

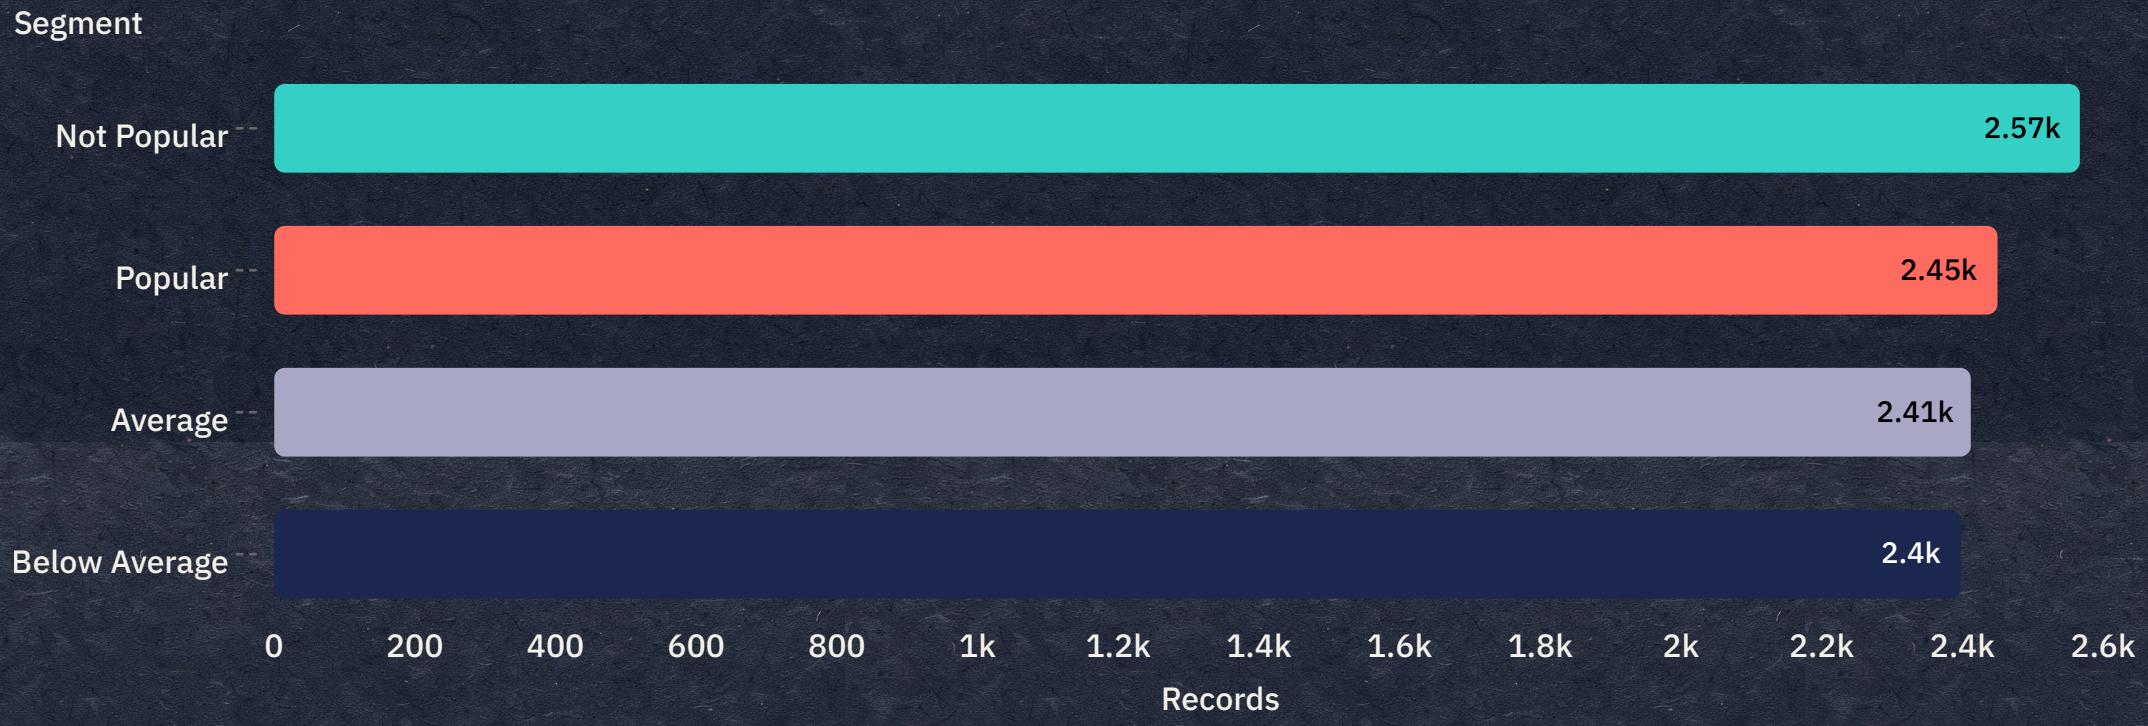

Movie-genre combinations · not distinct movies

Made with GAMMA

RATING SEGMENTS

Ratings are broadly balanced across four segments

Quartile-based analytical segments, not official audience classifications.

Not Popular · 2,567 records | Popular · 2,450 | Average · 2,412 | Below Average · 2,398

Made with GAMMA

RECORDED POPULARITY

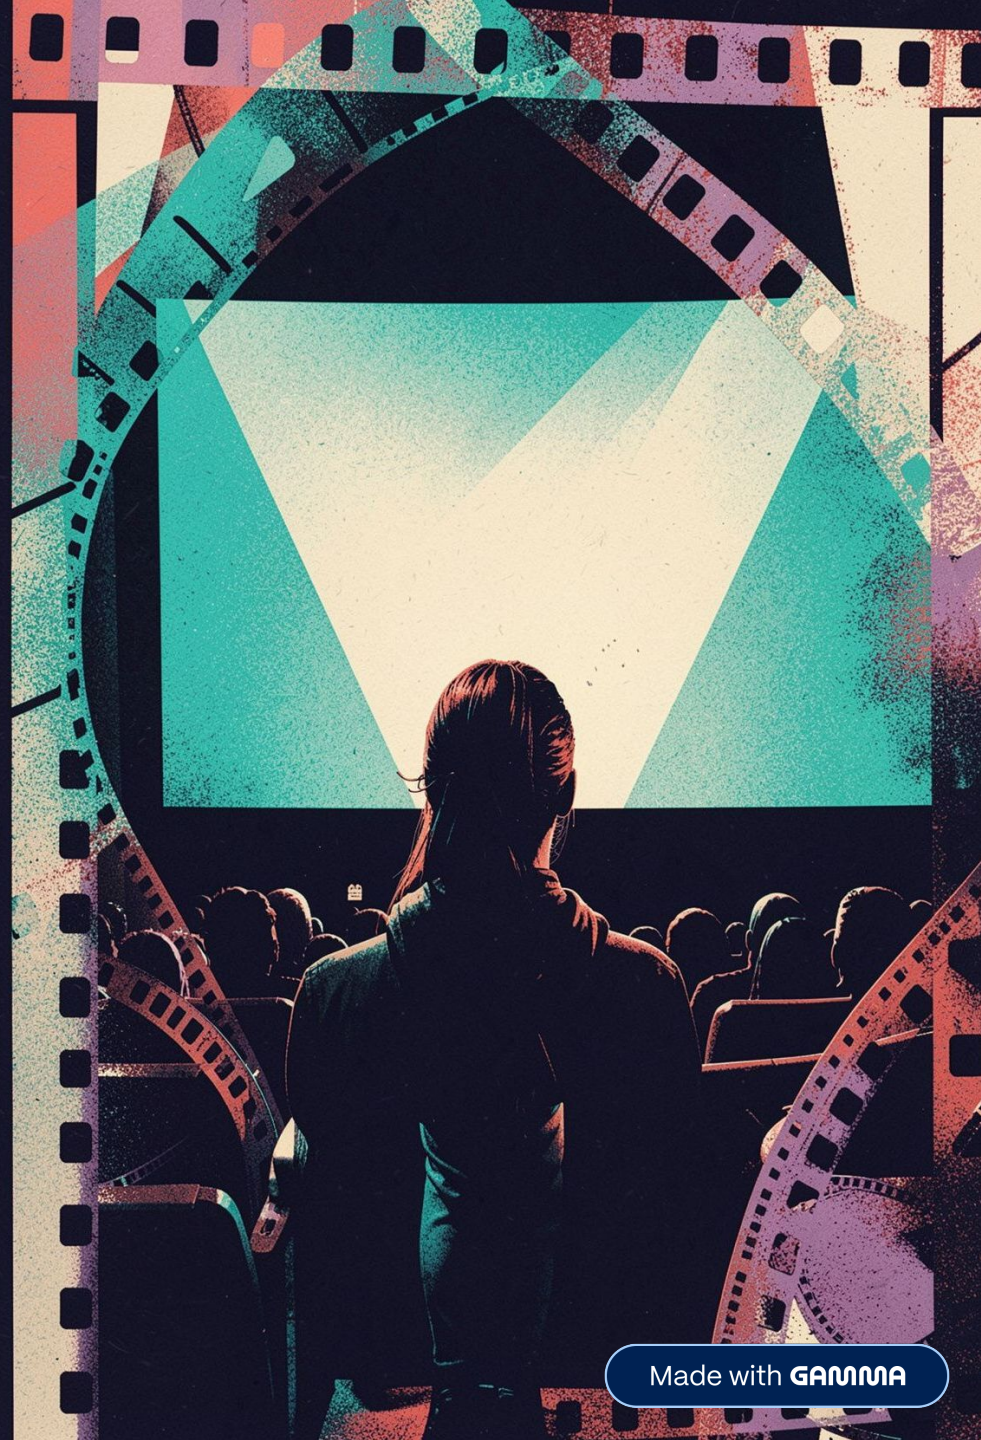

Spider-Man: No Way Home tops the recorded popularity metric

5,083.954

Popularity score · release year 2021

ACTION ADVENTURE SCIENCE FICTION

This score ranks first in the notebook output, but it should not be read as ticket sales, streaming views, profitability, or audience satisfaction.

Made with GAMMA

VALIDATION NEEDED

13.354

Minimum popularity score

Multiple movie records share this minimum in the current output.

The lowest popularity result needs a movie-level check

CURRENT OUTPUT

The notebook records a minimum popularity score of **13.354**.

NEXT CHECK

Verify the original movie-level dataset before naming a definitive lowest-ranked title or genre profile.

Made with GAMMA

RELEASE-YEAR ANALYSIS

Release-year findings are not yet validated

01 DATE CONVERSION

1970 is an incorrect reduction

A later date-conversion result incorrectly reduced release years to 1970.

02 UNCONFIRMED CLAIM

2020 cannot be called the peak

The claim that 2020 contains the most movies should not be presented as confirmed.

03 REPAIR THE SERIES

Recalculate before decisions

Restore the original date values, recalculate yearly counts, and replace the trend chart.

Made with GAMMA

WHAT THE FOUNDATION SUPPORTS

The analysis is a foundation for deeper movie research

What holds

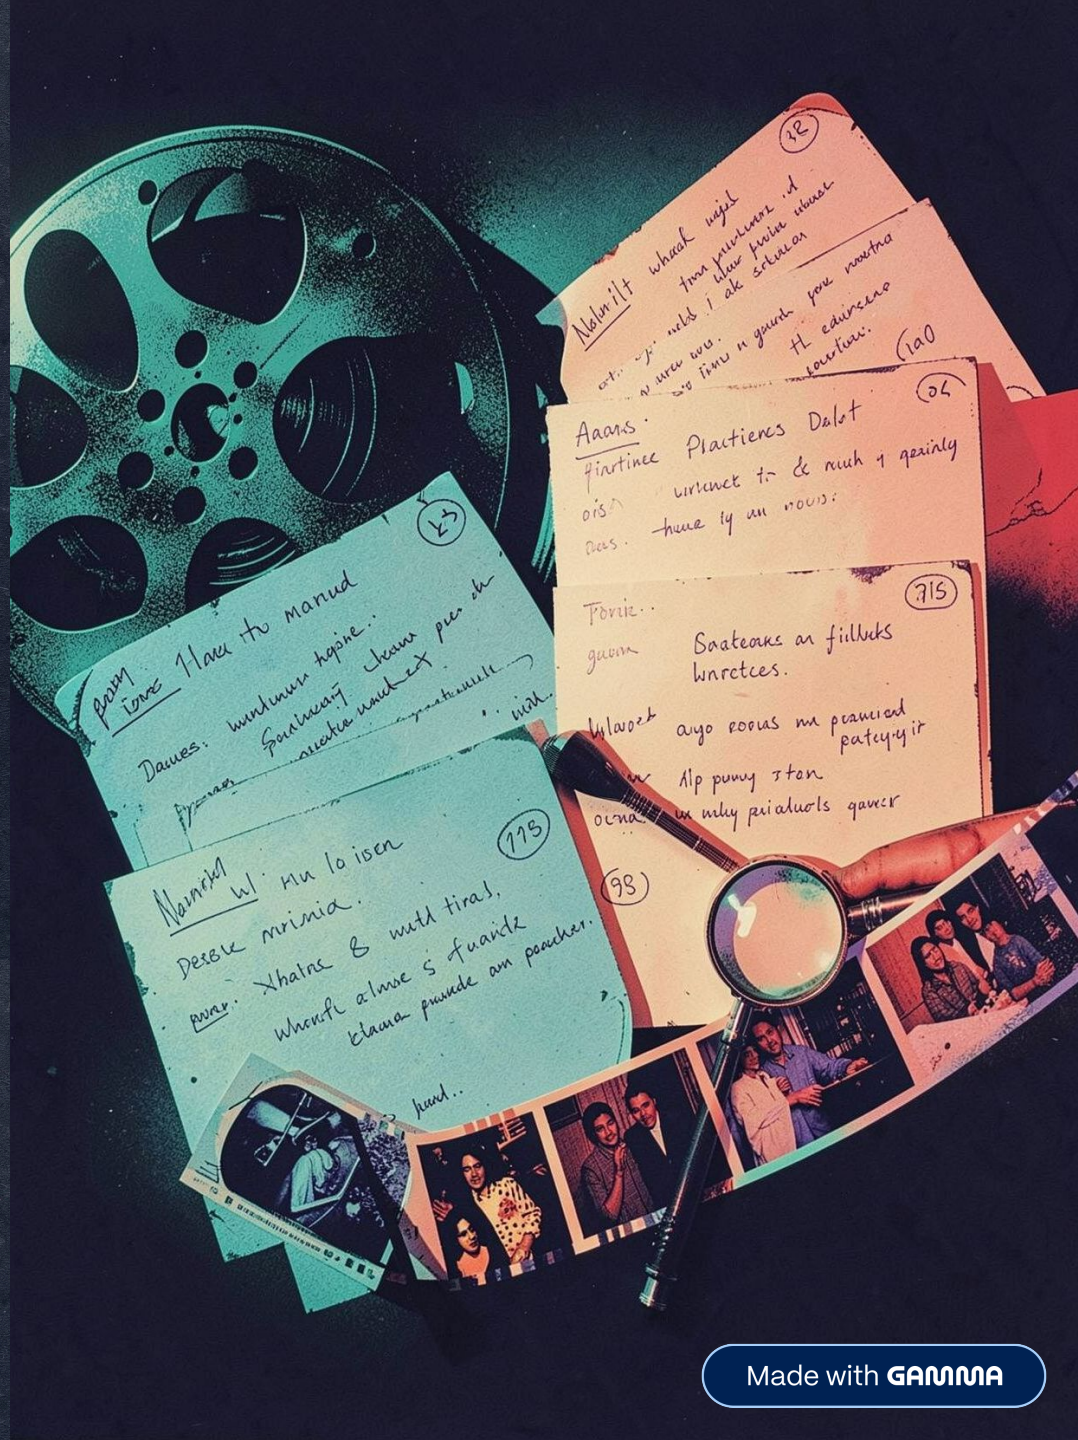

Drama is the most frequent genre in the recorded genre mix. Rating segments are relatively similar in size.

What leads

Spider-Man: No Way Home leads the recorded popularity metric.

Next

Compare genre-level ratings, use median popularity and sample sizes, test vote-count relationships, and validate release-year trends.
